SKIN FIRST.

Brand guide · English working edition

A retailer with a filter.

Arabic-first Saudi retail. Five Korean skincare records. One useful standard: show what is known, and label what is still pending.

PLAYFUL

Wit earns attention.

CREDIBLE

Facts earn trust.

SAUDI-NATIVE

Arabic leads the journey.

KOREAN-INFORMED

Maker identities stay visible.

Skin first. Hype second.

Owner-stated Saudi stock remains unverified.

Rounded. Punctuated. Selective.

Preserve the terminal dot, circular i-dots, and one coral optical spark. Never typeset the wordmark.

CLEAR SPACE

1× terminal-dot height on every side

MINIMUM

120 px screen / 32 mm print

Digitized concept. Owner approval, optical validation, and trademark clearance pending.

Calm canvas. Sharp decisions.

HOOK

Skin first. Hype second.

Wit opens the door.

UTILITY

Ingredients before exaggeration.

Facts carry the decision.

Arabic: Alexandria for expressive display; Noto Sans Arabic for dense information.

Use structural RTL. Isolate Latin brand names, ingredients, SKU codes, and numbers.

Brand behavior people can use.
